

Pickleball Robot — 1. Battery and power distribution

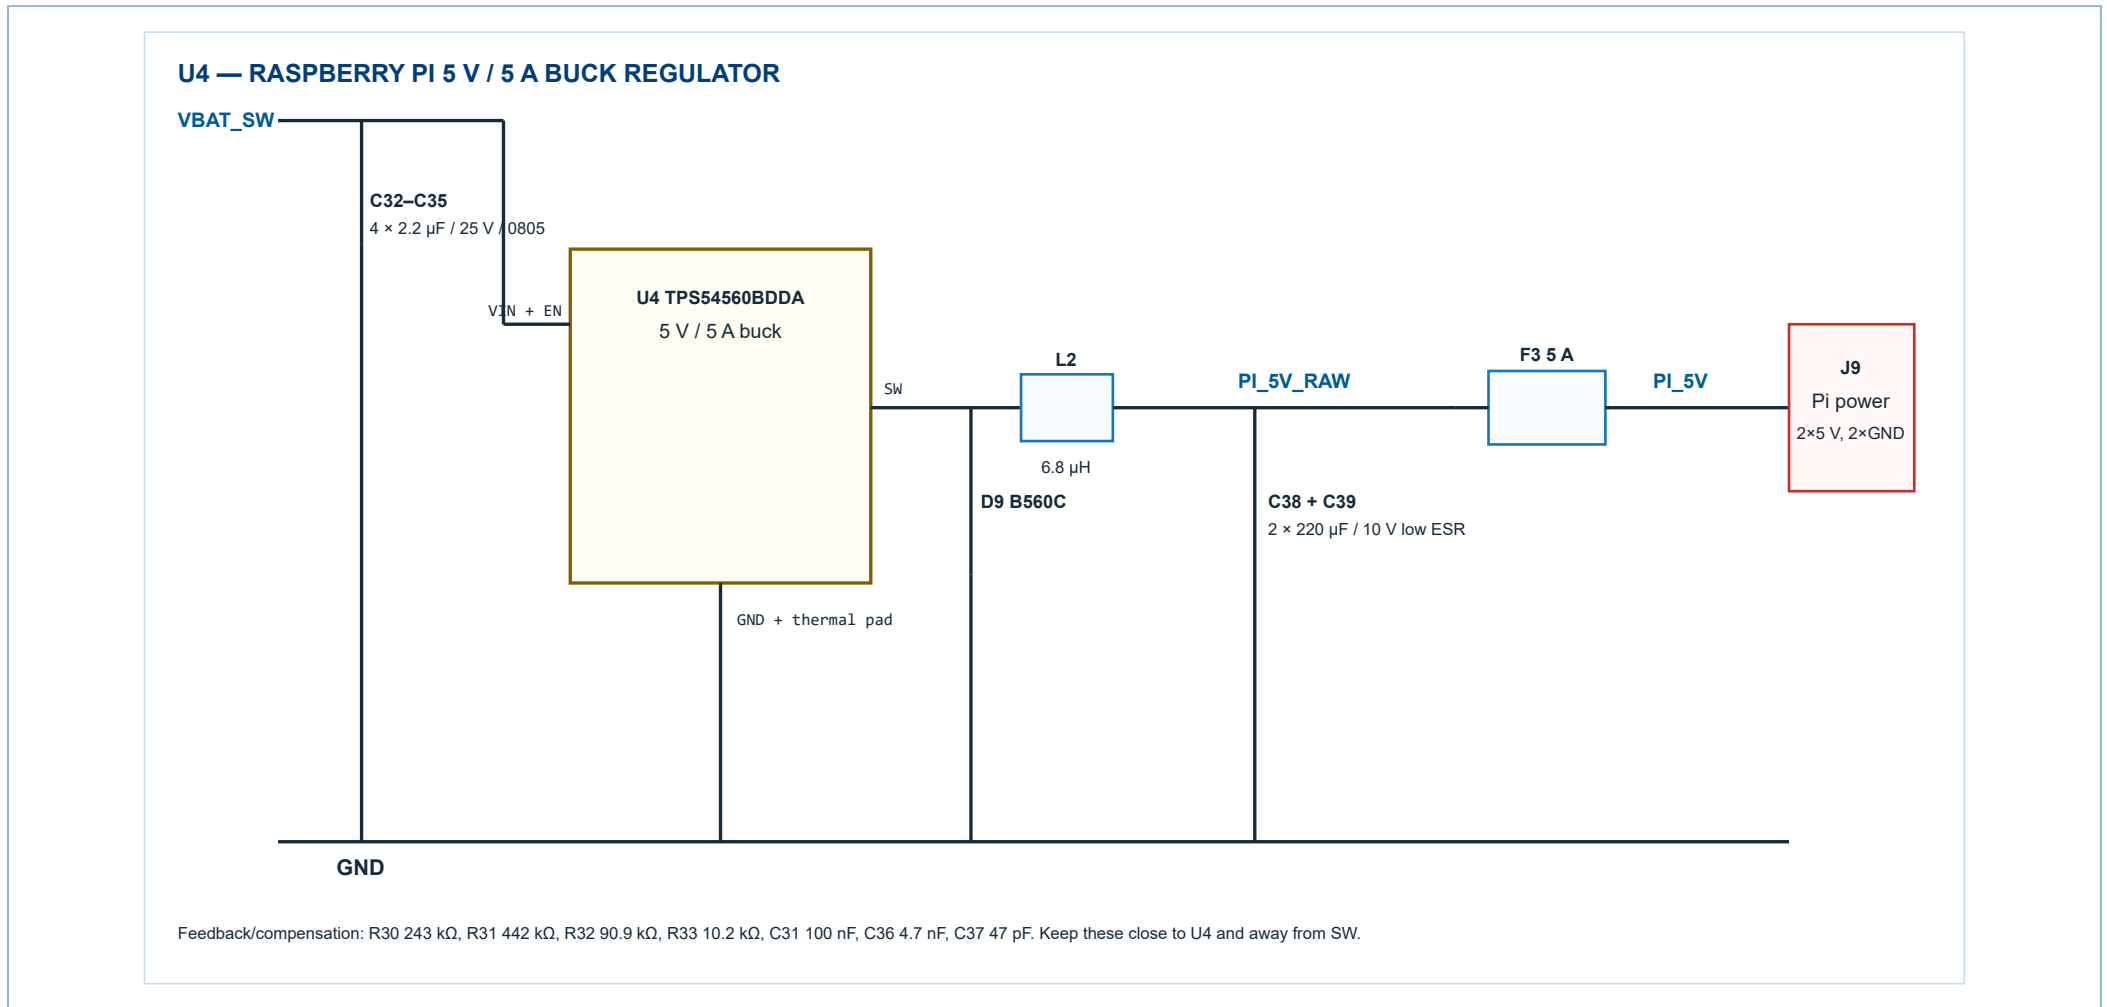

Readable schematic companion · all lines are electrical connections; named nets are blue.

This page shows the complete high-current distribution from the 3S battery.

Pickleball Robot — 2. Raspberry Pi power regulator

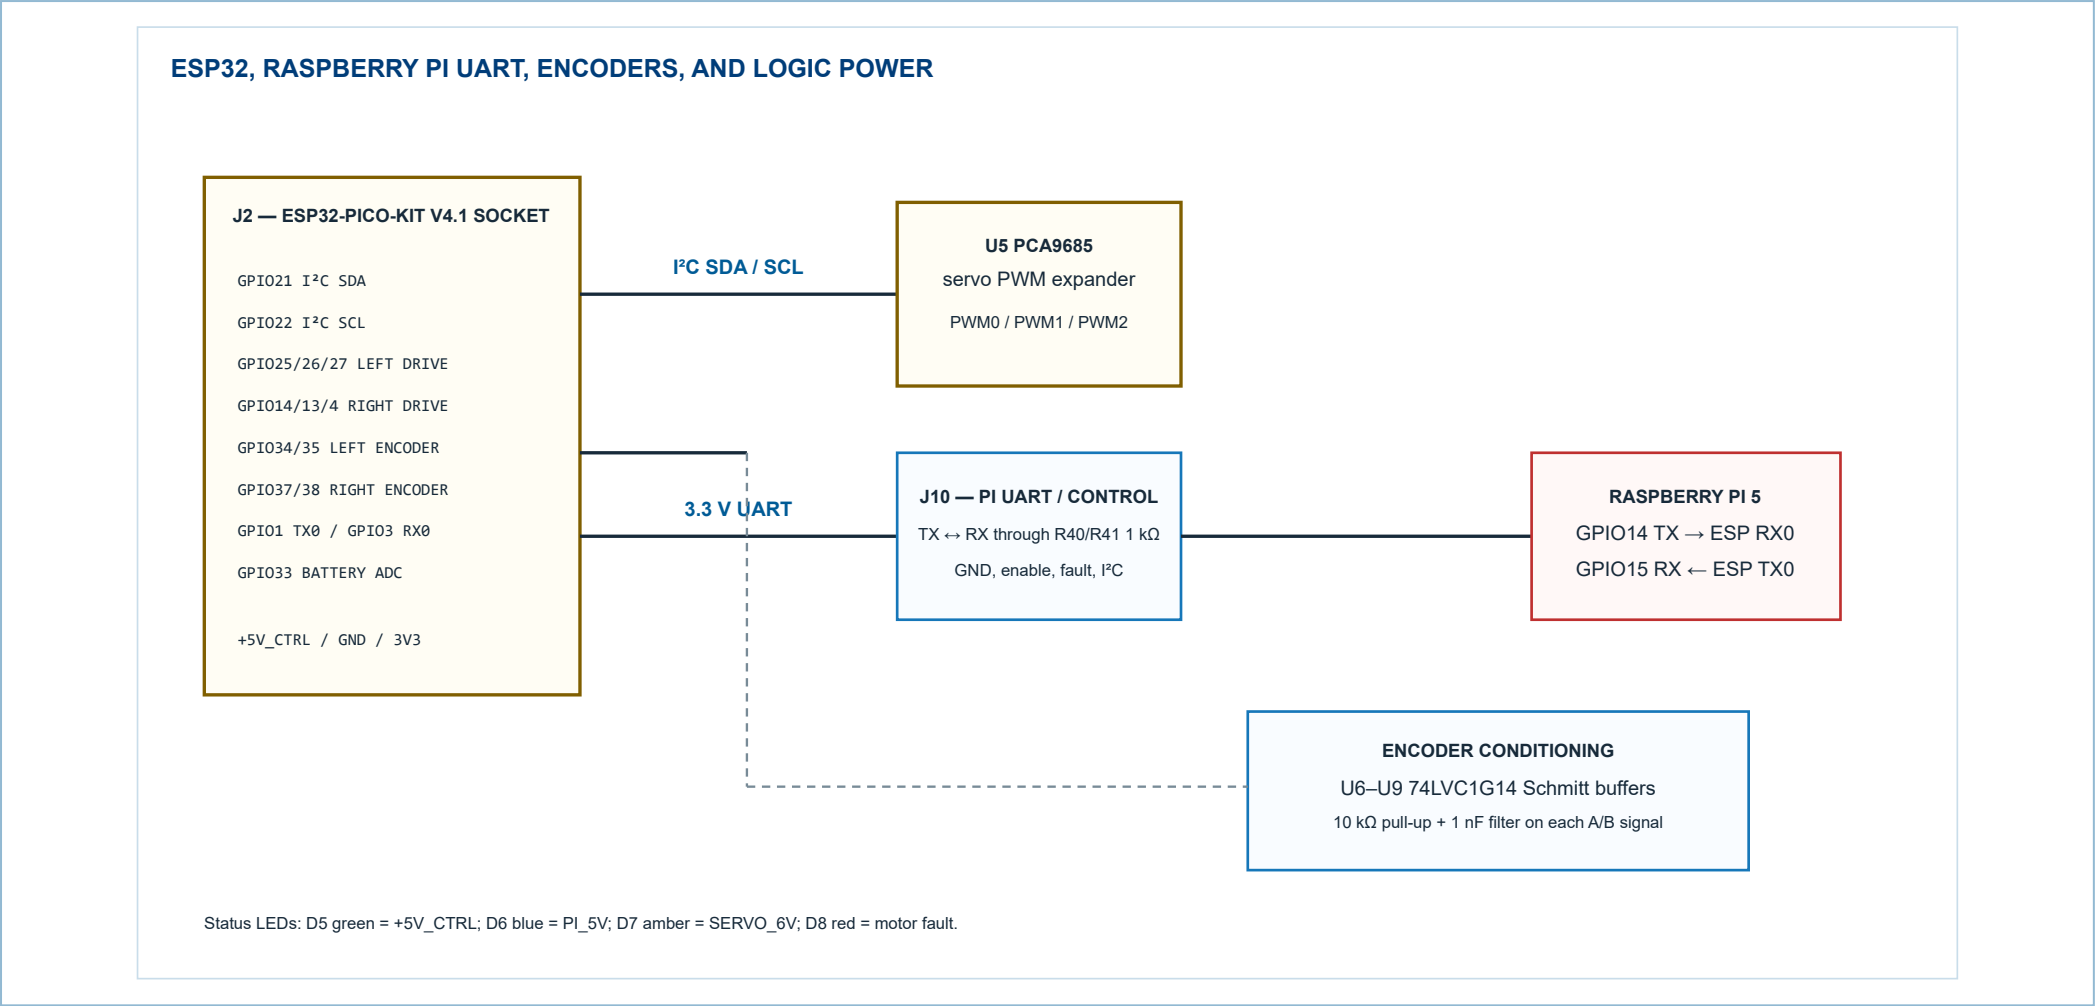

Readable schematic companion · all lines are electrical connections; named nets are blue.

All U4 parts are shown on this page; keep its switch loop compact on the PCB.

Pickleball Robot — 3. ESP32 and Pi signals

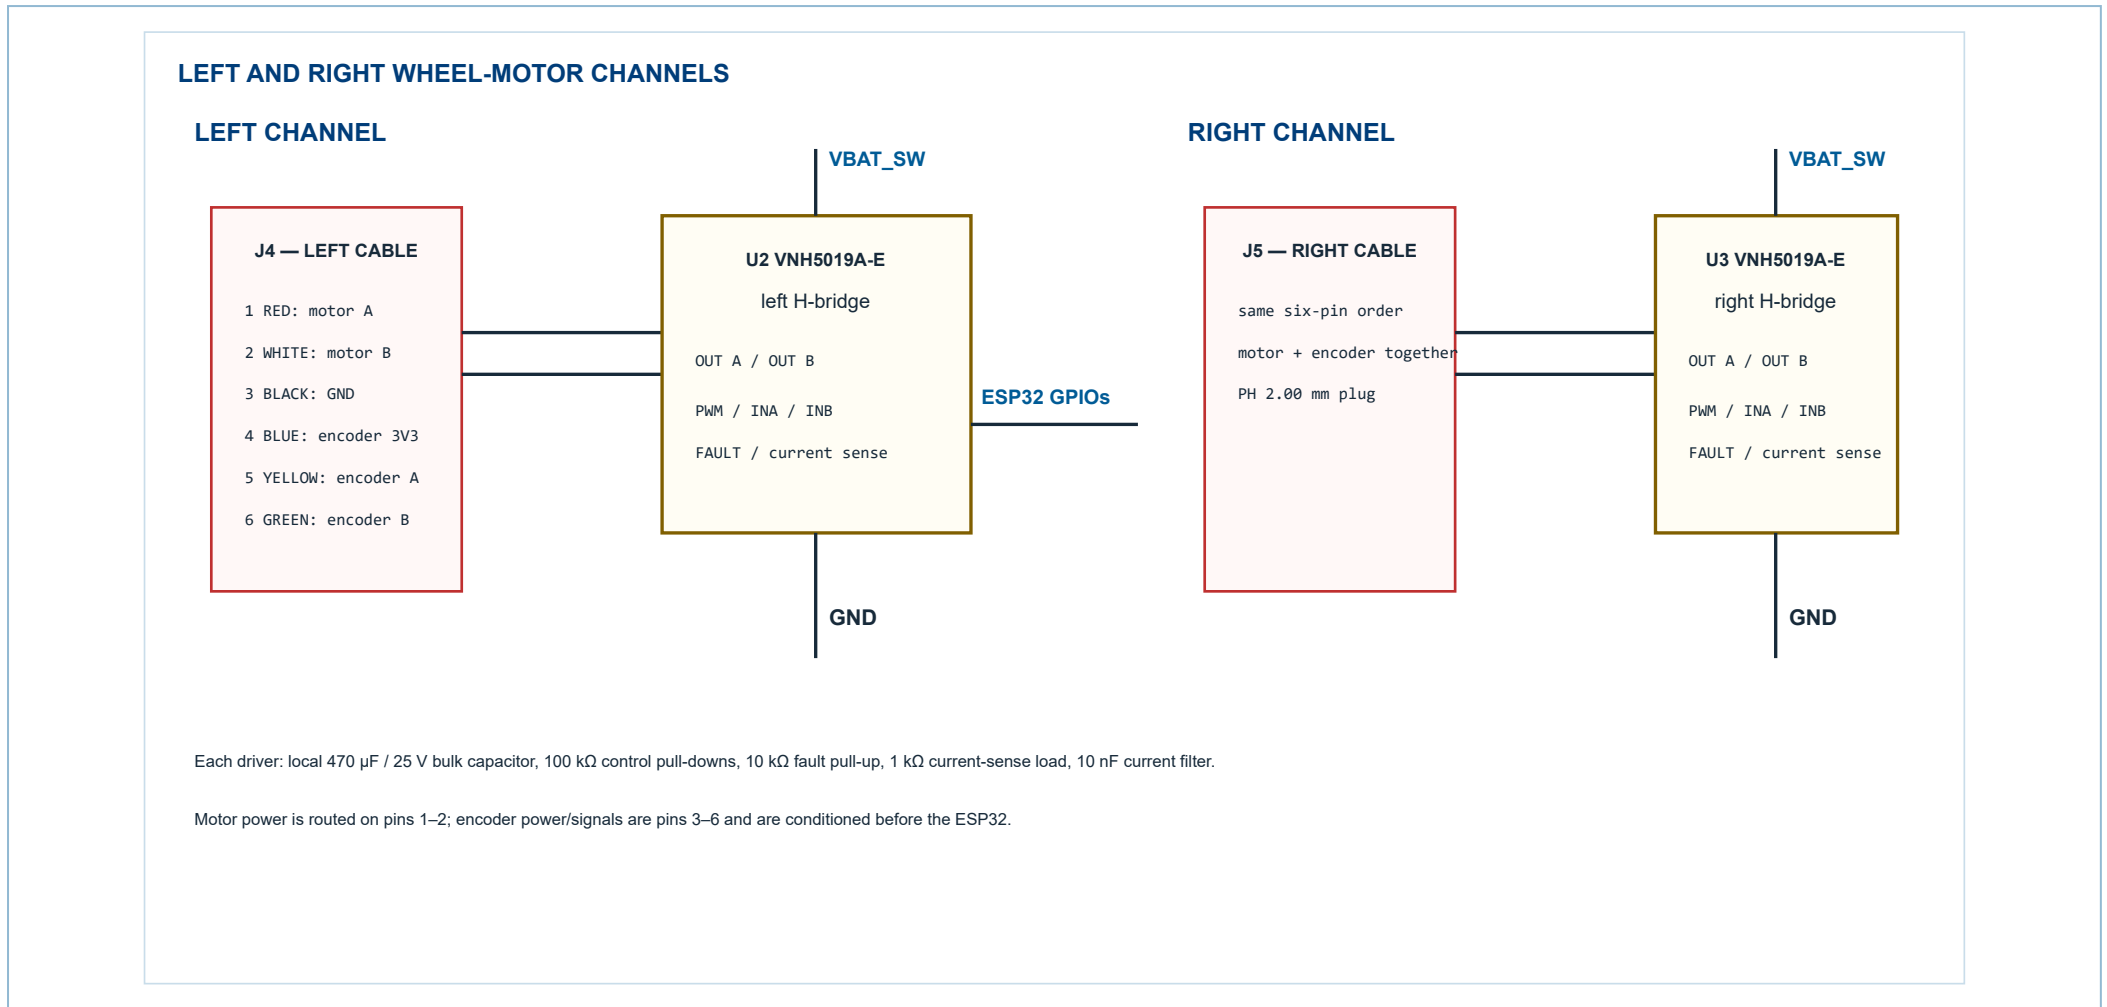

Readable schematic companion · all lines are electrical connections; named nets are blue.

Visible signal wiring and pin roles; GPIO names match the KiCad PCB source.

Pickleball Robot — 4. Wheel motors and encoders

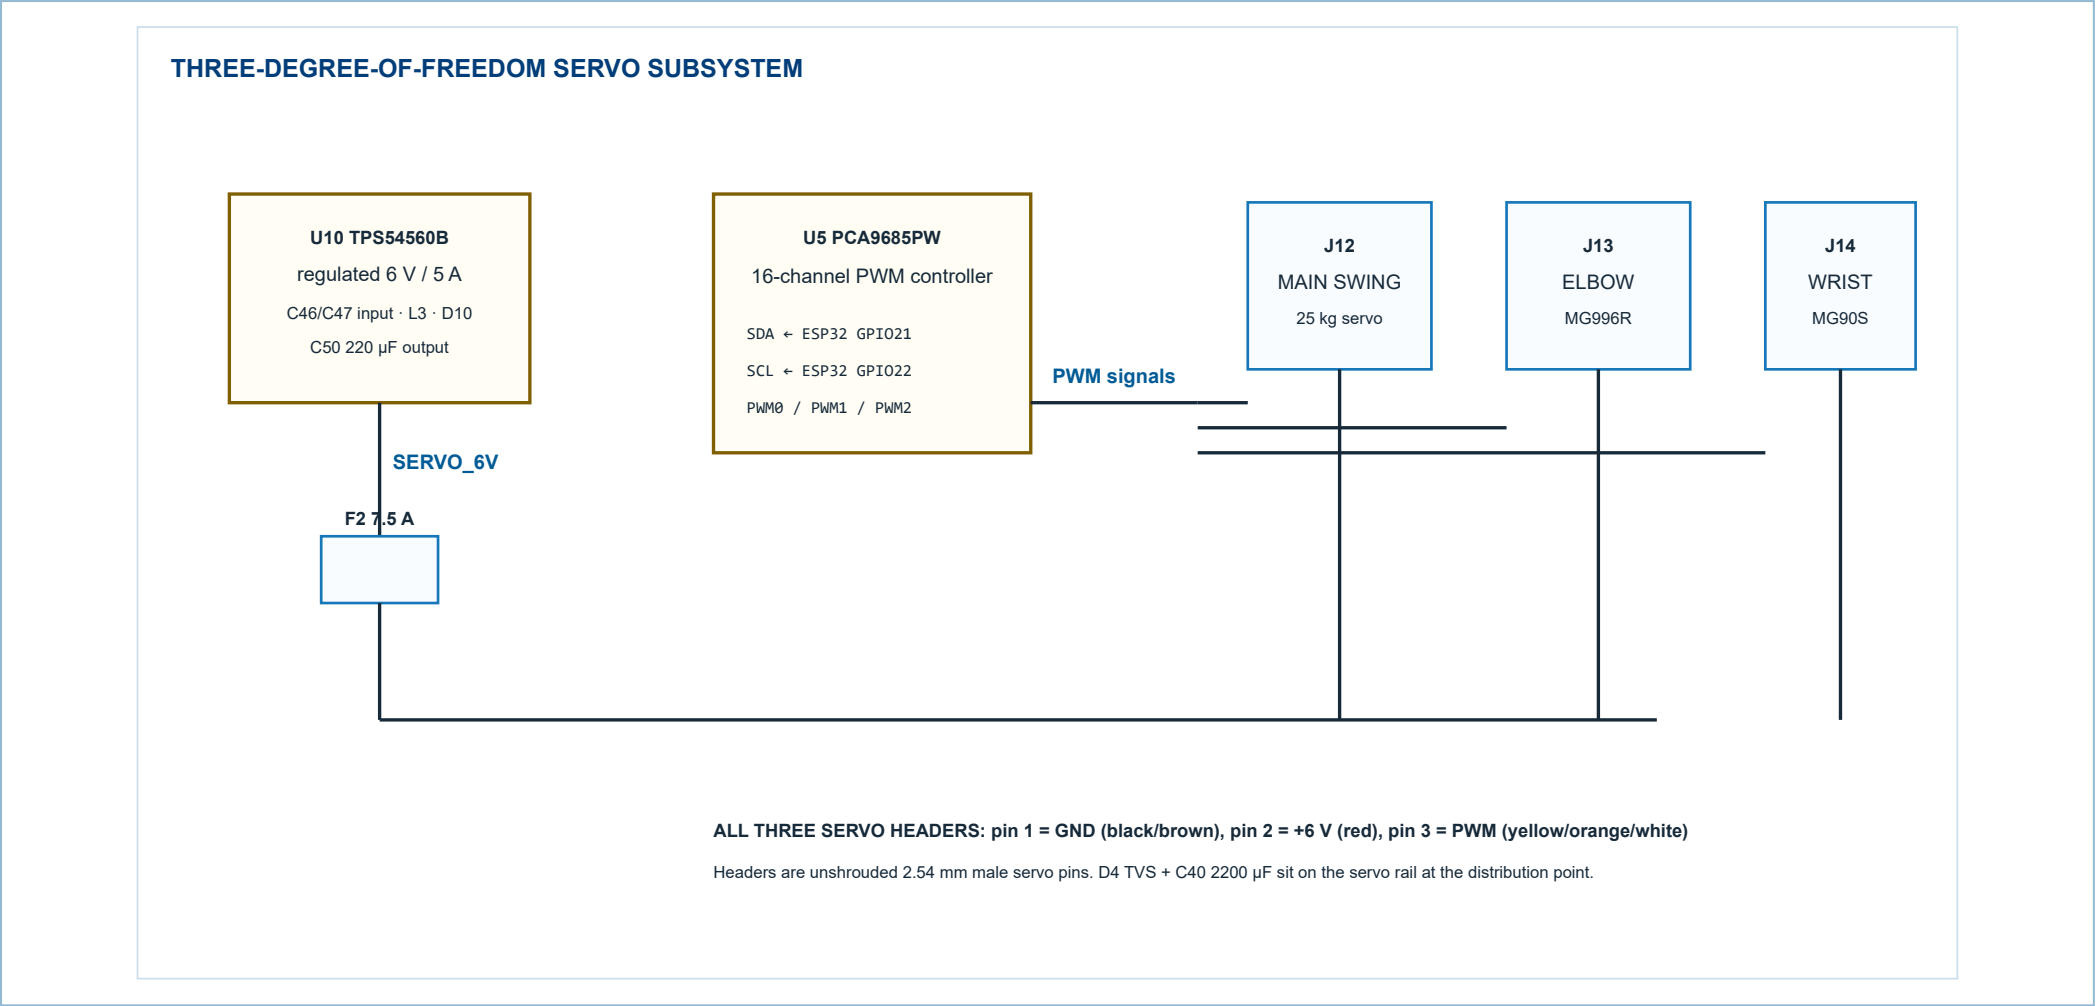

Readable schematic companion · all lines are electrical connections; named nets are blue.

Each physical motor uses one six-pin JST-PH connector.

Pickleball Robot — 5. Arm servos

Readable schematic companion · all lines are electrical connections; named nets are blue.

The arm has its own regulated 6 V rail and standard 2.54 mm servo headers.
